Anderson, J. M. Asymptotic properties of integral functions of genus zero . . . . .	151
Brown, B. M. On the distribution of the zeros of a polynomial . . . . .	241
Chakravarty, N. K. Some problems in eigenfunction expansions (I) . . . . .	135
Coulson, C. A. The use of commutator relationships in determining Schrödinger wave functions . . . . .	279
Croft, H. T. On the Gibbs phenomenon for the Fourier series of $\sin( t ^{-\alpha})$ , $\cos( t ^{-\alpha})$ . . . . .	97
Davies, H. On the Cauchy problem for the wave equation in two space dimensions . . . . .	9
Doss, R. On de la Vallée-Poussin's proof of the fundamental theorem in the theory of almost-periodic functions . . . . .	188
Eastham, M. S. P. On the discreteness of the spectrum in an eigenvalue problem . . . . .	46
Elliott, P. D. T. A. On sequences of integers . . . . .	35
Evans, T. A remark on a paper by Higman . . . . .	191
Everitt, W. N. Some asymptotic expansions of a fourth-order differential equation . . . . .	269
Fröhlich, A. Invariants for modules over commutative separable orders . . . . .	193
Hall, I. M. The generalized Whitney sum . . . . .	360
Husseini, S. Y. On the representation of loopspaces as complexes of the reduced product type . . . . .	13
Kuttner, B., and Maddox, I. J. On strong convergence factors . . . . .	165
Macbeath, A. M. Addendum on a theorem by J. Nielsen . . . . .	71
Maddox, I. J., <i>see</i> Kuttner, B.	
Marcus, M., and Minc, H. Diagonal products in doubly stochastic matrices . . . . .	32
McLeod, J. B. On the continuous spectra of small potentials . . . . .	85
— On the continuous spectra of large negative potentials . . . . .	233
Minc, H., <i>see</i> Marcus, M.	
Morris, A. O. On an algebra of symmetric functions . . . . .	53
Northcott, D. G. and Reufel, M. A generalization of the concept of length . . . . .	297
Petersen, G. M. On pairs of summability matrices . . . . .	72
Porter, G. J. Spaces with vanishing Whitehead products . . . . .	77

<b>Pryce, J. D.</b> On type $F$ semi-algebras of continuous functions . . . . .	65
<b>Reilly, N. R.</b> Embedding inverse semigroups in bisimple inverse semigroups . . . . .	183
<b>Reufel, M.</b> <i>see</i> Northcott, D. G.	
<b>Sinnadurai, J. St.-C. L.</b> Representation of integers as sums of six cubes and one square . . . . .	289
<b>Slifker, J. F.</b> Exotic multiplications on $S^3$ . . . . .	322
<b>Urwin, K. M.</b> Integral equations for the paraboloidal wave functions (II) . . . . .	257
<b>Verblunsky, S.</b> On some biorthogonal systems (II) . . . . .	1
<b>Wall, C. T. C.</b> Open 3-manifolds which are 1-connected at infinity . . . . .	263
<b>White, G. K.</b> Grid bases in $n$ -space . . . . .	126
